Tesla/Electric Vehicle Owners Recharge at St. Francis Inn

St. Augustine, FL - Owners of Tesla Model S and other electric cars can now recharge during their stay at St. Francis Inn. With a passion for 'staying green,' the Inn is pleased to support guests who drive eco-friendly vehicles, allowing them to recharge their car battery as they relax and recharge their own "battery!" Two complimentary Tesla/electric vehicle charging stations and designated parking spaces are located in the Inn's private parking lot. Vehicles can be charged while their owners sleep, as conveniently as they are accustomed to at home. The charging station has been installed at St. Francis Inn through the Inn's prestigious membership in the Select Registry™ group of premier lodging properties and its partnership with Tesla Motors. St. Francis Inn is delighted to make roadtrips easier for electric vehicle owners, leading the B&B industry by offering this high tech guest amenity.

Tesla's growing Supercharger network (now 425 stations along frequently-traveled highways) has inspired Model S owners to hit the road in increasing numbers. Owners can drive all day, charging for 30-40 minutes at Superchargers, and then stop at night to stay and charge at a Select Registry property with a Tesla High Power Wall Connector (this charger adds 58 miles of range per hour, topping off Model S's full 265 miles of range in just a few hours.)
